## CAPABILITES

Our dedicated manufacturing facility provides the largest selection of stock tools in North America. Comprehensive automated assembly of components offered in both top and bottom fill. Interchangeable parts allow for flexible fill levels and a full assortment of capacities ranging from 13g to 100g. The manufacturing site is ISO:9001 certified, follows GMP guidelines, quality assurance and preventative maintenance programs.

Sticks can be used for a multitude of topical applications offering no-mess convenience. This packaging solution allows brands new marketing options and product extensions. Our full assortment of sizes provides variety from travel size for on-the-go ease to bonus size sticks providing promotional options.

For natural, organic, clean or botanical products, show customers your brand's dedication to the environment with our Post Consumer Recycled (PCR) sticks. Varying PCR percentages can be included in your package.

We have worked extensively in partnership with well-renowned companies to establish their brand image. Work with our experienced sales and technical team to collaborate on a custom design and features to provide a distinct stick package.
